

Eaton Vance Worldwide Health Sciences Fund

A diversified global fund concentrating in health sciences companies.

The Fund

The Fund invests worldwide in companies principally engaged in the discovery, development, production or distribution of products (or services) related to scientific advances in health care, including biotechnology, pharmaceuticals, diagnostics, managed health care, and medical equipment and supplies.

The Approach

The portfolio managers seek to purchase stocks that are reasonably priced in relation to their fundamental value and that the portfolio managers believe will grow in value over time regardless of short-term market fluctuations. The stock selection process is based on numerous factors, including the potential to increase market share (for larger companies), and the potential of research and development projects (for smaller companies). The team is based in Boston and London.

The Features

Growth in the health care sector is led by aging demographics, innovation and rising global incomes. As the global population ages and becomes wealthier, we believe health care spending is likely to continue to rise. Innovation drives growth in the sector, as increased scientific understanding leads to new breakthroughs.

Past performance is no guarantee of future results. Investment return and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Performance is for the stated time period only; due to market volatility, the Fund's current performance may be lower or higher than quoted. For the Fund's performance as of the most recent month-end, please refer to eatonvance.com. Returns are historical and are calculated by determining the percentage change in net asset value (NAV) with all distributions reinvested. Returns for other classes of shares offered by the Fund are different. Performance less than or equal to one year is cumulative. Total return prior to commencement of I Shares reflects the total return of another class adjusted, where indicated, to reflect applicable sales charges (but not adjusted for other expenses). If adjusted for expenses, return would be different. The minimum investment is \$1,000 for A Shares and \$250,000 for I Shares. Minimums may be waived in certain situations. Please see the prospectus for additional information.

¹Source: Fund prospectus. Net expense ratio reflects a contractual expense reimbursement that continues through 12/31/19. Without the reimbursement, if applicable, performance would have been lower. ²MSCI World Health Care Index is an unmanaged index of health care sector equities within the MSCI World Index. MSCI indexes are net of foreign withholding taxes. Source: MSCI. MSCI data may not be reproduced or used for any other purpose. MSCI provides no warranties, has not prepared or approved this report, and has no liability hereunder. Unless otherwise stated, index returns do not reflect the effect of any applicable sales charges, commissions, expenses, taxes or leverage, as applicable. It is not possible to invest directly in an index. Historical performance of the index illustrates market trends and does not represent the past or future performance of the fund.

About Risk: The value of investments held by the Fund may increase or decrease in response to economic, and financial events (whether real, expected or perceived) in the U.S. and global markets. The value of equity securities is sensitive to stock market volatility. Because the Fund investments may be concentrated in a particular industry, the Fund share value may fluctuate more than that of a less concentrated fund. Investments in foreign instruments or currencies can involve greater risk and volatility than U.S. investments because of adverse market, economic, political, regulatory, geopolitical, currency exchange rates or other conditions. Smaller companies are generally subject to greater price fluctuations, limited liquidity, higher transaction costs and higher investment risk than larger, more established companies. The Fund is exposed to liquidity risk when trading volume, lack of a market maker or trading partner, large position size, market conditions, or legal restrictions impair its ability to sell particular investments or to sell them at advantageous market prices. No fund is a complete investment program and you may lose money investing in a fund. The Fund may engage in other investment practices that may involve additional risks and you should review the Fund prospectus for a complete description.

³Percent of total net assets. Top 10 Holdings excludes cash and equivalents. Portfolio profile subject to change due to active management. Percentages may not total 100% due to rounding.

Before investing, investors should consider carefully the investment objectives, risks, charges and expenses of a mutual fund. This and other important information is contained in the prospectus and summary prospectus, which can be obtained from a financial advisor. Prospective investors should read the prospectus carefully before investing.
