Footnotes:			
 Market value in U.S. dollars as a percentage of total net assets (TNA). 			

(2) Face amount in U.S. dollars as a percentage of TNA.

(3) Economic exposures are determined as follows:

For Futures: the economic value of the contracts in U.S. dollars as a percentage of TNA;
For Interest Rate Swaps: the notional value of the swaps in U.S. dollars as a percentage of TNA;
For Credit Default Swaps: the notional value in U.S. dollars plus or minus accumulated gain or loss as a percentage of TNA;
and
For Options: delta-adjusted notional value in U.S. dollars as a percentage of TNA.

Before investing, investors should consider carefully the investment objectives, risks, charges and expenses of a mutual fund. This and other important information is contained in the prospectus and summary prospectus, which can be obtained from a financial advisor. Prospective investors should read the prospectus carefully before investing.
